

The screenshot displays the simplCRM for Sales application interface. The top section shows a dashboard with 'My Sales' and 'My Open Opportunities' views, including a funnel chart, a pie chart, and a table of leads. A 'Copilot' chat window is visible on the right. The bottom section shows a detailed view of an 'Alpine new lead' opportunity, with a progress bar indicating stages: New Lead, Qualify, and New Opportunity (4 Hrs). A 'Next Stage' button is highlighted.

## simplCRM for Sales

- The **simplCRM for sales app** is designed to help businesses manage their customer relationships more efficiently. It's a simple, intuitive CRM solution that focuses on providing core tools necessary for sales management without overwhelming users with unnecessary features.

The screenshot shows the 'Support case for Fabrikam - Unsaved' request form. The progress bar indicates the following stages:

- New Request:** Completed (checkmark)
- Identify:** Completed (checkmark)
- Research (< 1 Min):** Active (highlighted)
- Close:** Pending (circle)

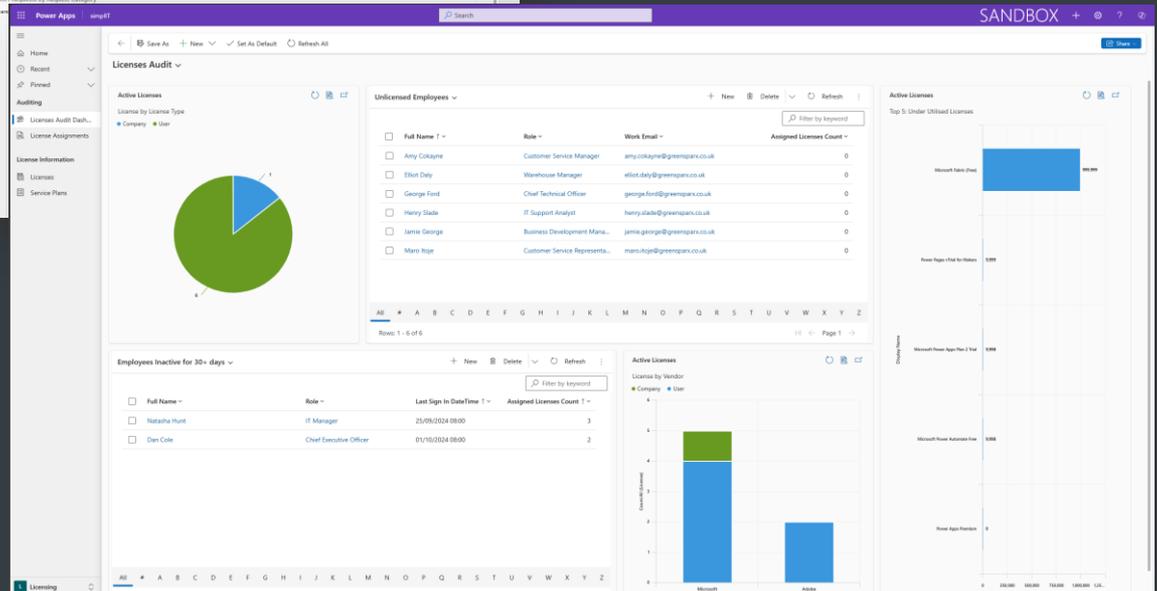

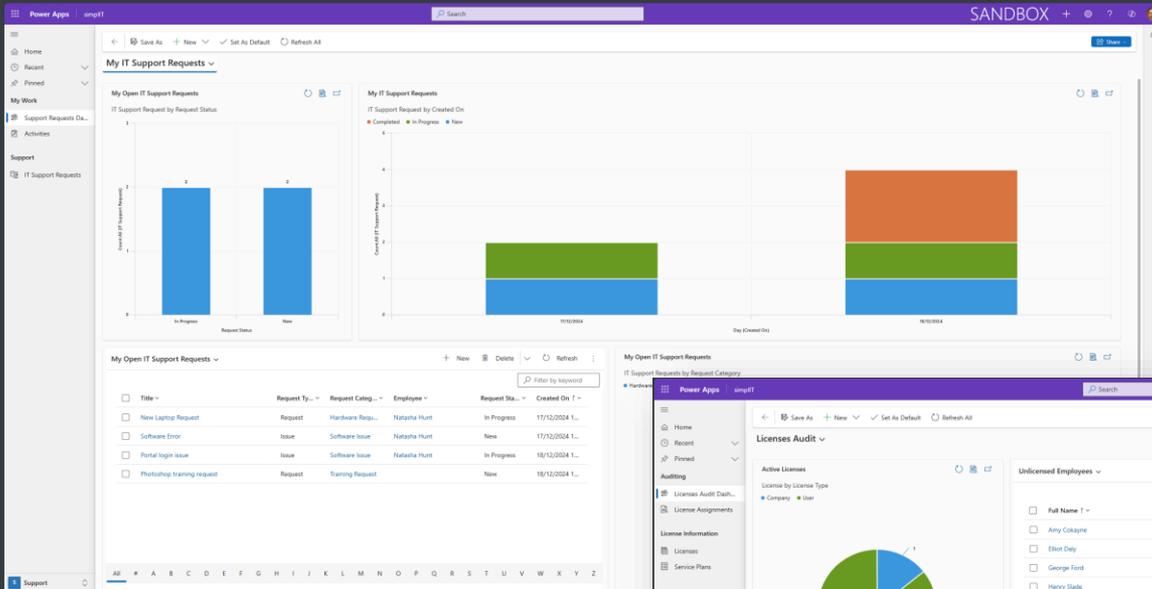

The 'Research' stage is active for less than one minute. The form fields are as follows:

- Request Type:** Case
- Title:** Support case for Fabrikam
- Request Category:** Product Support

A 'Next Stage' button is visible at the bottom right of the form.

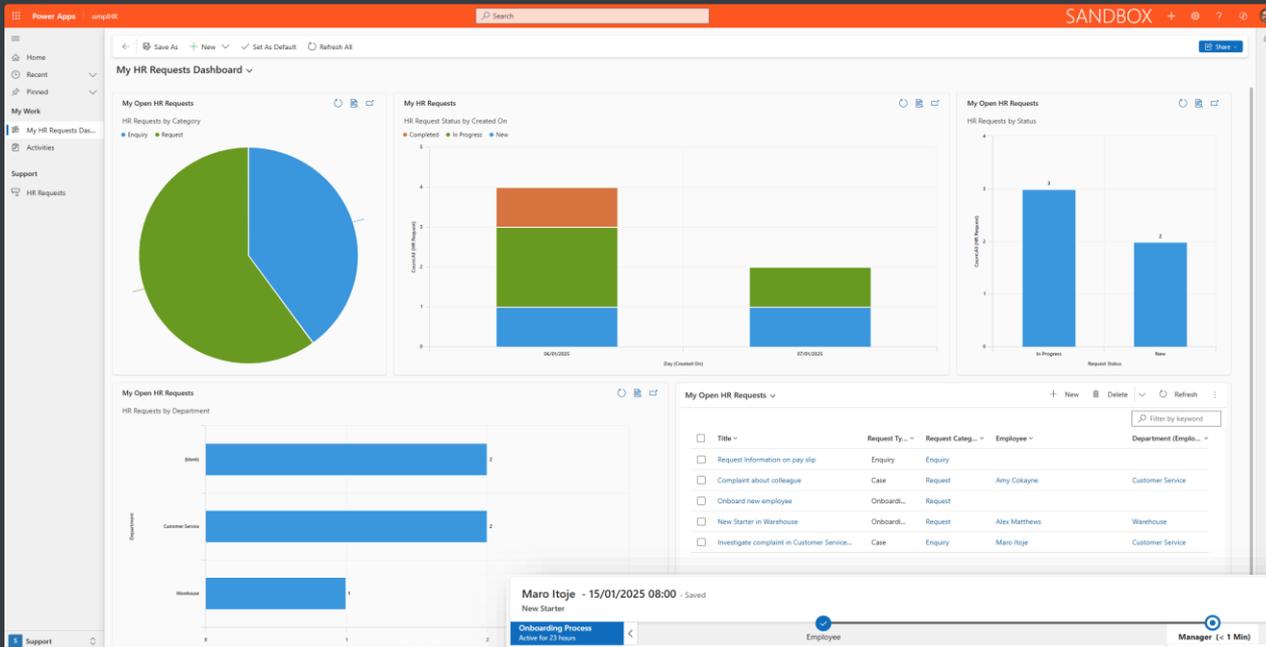

## simplCRM for Service

- The **simplCRM for service app** is designed to help businesses deliver exceptional customer service by streamlining support processes and providing related comprehensive tools for service management.

## simplIT

- The **simplIT app** offers the essential functions for managing a successful IT department. By focussing on support requests, asset management and tracking licenses, even a small team can effectively manage a business's technology needs whilst maintaining a cost-effective approach.

## simplHR

- The **simplHR app** simplifies HR tasks by recording employee information, handling enquiries and requests, managing the onboarding processes, and improving communication. It ensures flexibility and convenience by providing HR processes for both employees and HR teams.

## simplATS

- The **simplATS app** is a streamlined and user-friendly Applicant Tracking System (ATS) designed to simplify and enhance the hiring process for businesses. By making core functions intuitive and accessible, hiring managers and HR teams can seamlessly collaborate on the end-to-end requirements to find and onboard new employees.

The screenshot displays the simpliPLAN application interface. The top navigation bar includes 'Power Apps | simpliPLAN' and a search bar. The main dashboard is titled 'My Tasks Dashboard' and features several visualizations:
 

- Task Pipeline by Task Status:** A funnel chart showing the distribution of tasks across different stages.
- Task by Task Status:** A pie chart showing the percentage of tasks in various statuses like 'In Progress', 'Not Started', and 'Overdue'.
- Task by Due Date and Task Status:** A bar chart showing the count of tasks for different due dates and statuses.
- Task by Priority:** A pie chart showing the distribution of tasks by priority levels such as 'High', 'Medium', and 'Low'.
- Other Queues and Views:** Four summary cards showing counts for 'My Action Tasks Filtered' (6), 'My Overdue Tasks Filtered' (5), 'My Projects' (3), and 'Active Milestones' (4).

 Below the dashboard, a detailed view for 'Stage 1' is shown, including a description, start and due dates, and a completion percentage. At the bottom, a Gantt chart displays a project schedule with tasks like 'Task 1' through 'Task 14' plotted against a timeline from January 6th to 31st, 2025.

# simpliPLAN

- The **simpliPLAN app** is a comprehensive project planning tool designed to simplify the process of managing projects from start to finish. Combing powerful features with an intuitive interface, ensures that project management is both efficient and effective.
