The simplAPP Suite

simplCRM for Sales

- The **simplCRM for sales app** is designed to help businesses manage their customer relationships more efficiently. It's a simple, intuitive CRM solution that focuses on providing core tools necessary for sales management without overwhelming users with unnecessary features.

simplCRM for Service

- The **simplCRM for service app** is designed to help businesses deliver exceptional customer service by streamlining support processes and providing comprehensive tools for service management.

simplIT

- The **simplIT app** offers the essential functions for managing a successful IT department. By focussing on support requests, asset management and tracking licenses, even a small team can effectively manage a business's technology needs whilst maintaining a cost-effective approach.

simplHR

- The **simplHR app** simplifies HR tasks by recording employee information, handling enquiries and requests, managing the onboarding processes, and improving communication. It ensures flexibility and convenience by providing HR processes for both employees and HR teams.

simplATS

- The **simplATS app** is a streamlined and user-friendly Applicant Tracking System (ATS) designed to simplify and enhance the hiring process for businesses. By making core functions intuitive and accessible, hiring managers and HR teams can seamlessly collaborate on the end-to-end requirements to find and onboard new employees.

simplPLAN

- The **simplPLAN app** is a comprehensive project planning tool designed to simplify the process of managing projects from start to finish. Combing powerful features with an intuitive interface, ensures that project management is both efficient and effective.
